Challenge

Many customers of HF Mixing Group use their machines without a break. The connected database servers should also be permanently be highly available. And the high-availability solution had to be as economical and economical and easy to operate in an emergency. Requirements that present every IT and software company with a major challenge.

Why Libelle *DBShadow*?

Libelle *DBShadow* was ultimately able to meet the requirements. The easy-to-use solution with the patented time funnel principle enables a reliable and time-delayed database mirroring: Changes are only transferred from the funnel to the mirror system after a defined time interval or in the event of a malfunction.
