“ Our expectations were high, but were not disappointed. The service was extremely competent. ”

## Challenge

More than 50.000 articles and more than 30 locations worldwide: manual system copies are definitely out of place with these orders of magnitude. Klingspor AG was therefore looking for a solution that would enable automated system copies of the entire SAP landscape and at any intervals.

## Why Libelle SystemCopy?

Once the decision was made and the start date set, the installation and configuration was completed within a few days with the Libelle team. Thanks to Libelle SystemCopy, all the manual work involved in performing system system copies has been automated. Klingspor refreshes SAP systems several times a year since the introduction of LSC.
