

# Libelle *DataMasking* Cloud Edition

With Libelle *DataMasking* you can anonymise sensitive and personal data on non-production systems in a DSGVO-compliant manner and work sensibly with it. The Cloud Edition is available on the Amazon Web Services and Microsoft Azure marketplaces and is therefore available at any time.

Quick and easily via the Cloud Marketplaces available. Can be used without installation effort.

Delivers realistic looking and logically correct data for optimal tests or training.

The anonymisation of sensitive data offers protection when there is an unauthorised data access or data theft on non-production systems.

Works on all common databases and can be carried out overnight, due to definable configurations.

# Anonymisation of data without installation effort

## Libelle **DataMasking** Cloud Edition AWS & Azure Marketplace

New business requirements can result in the partially or completely shift of the IT landscape into the cloud. In general, the trend is towards a hybrid IT landscape consisting of cloud and on-premises solutions. Again you can anonymise your sensitive and personal data easily and securely with Libelle **DataMasking**.

**These are the advantages:**

### On Cloud

Without any installation effort, you can integrate Libelle **DataMasking** into your hybrid or on-cloud environment quickly and easily. Of course, the full range of functions is also available to you with the Cloud Edition.

### Quick

Libelle **DataMasking** works at database level. This allows you to anonymise up to 200,000 data entries per second. If that is not fast enough, tables can also be anonymised in parallel.

### Ease of use

Over 40 anonymisation algorithms and a reference database with defined target values are supplied by Libelle **DataMasking** as standard. However, if you wish, you can also adapt everything as required.

### Realistic

Libelle **DataMasking** transforms to realistic looking and logically correct data. You can test, train and evaluate realistically on your non-production systems – without a concrete reference to a person.
