

**Maintained SAP® Master Data:
More efficient processes.
Better decisions.**

Out-of-the-box for SAP® R/3® and SAP S/4HANA®

Libelle Master Data Services Suite

Simplify data collection, processing, and maintenance.

Permanent improvement of quality

Simple Workflows

Mass maintenance programs for daily use and migration projects

Central Master Data Repository (Single Point of Truth)

„More than 60% of our master data was outdated and simply rubbish that we had dragged along. Now our master data quality is permanently between 95 and 98%“

[Team Leader SAP Applications, Mechanical Engineering]

Increase quality of master data. Reduce time and effort required for creation and maintenance - Libelle Master Data Services Suite

The basis for business decisions, digital processes and automation should be well maintained master data. Data consistency and quality are essential for this: from entry and maintenance to deactivation of master data. The entire life cycle of single or mass master data has to be managed with the best ease of use. With the **Master Data Services Suite** you have the entire life cycle in one toolbox.

What do users appreciate most?

The complete master data life cycle, from the first entry to archiving

Modules for single or mass entry and maintenance of master data of different information types. Also supported by export and import functionalities for csv files.

Defined processes support clarity and structure in the master data

Workflow, responsibilities, and quality control mechanisms ensure high-quality and completeness of master data records from the very first moment of their existence.

For daily operation and projects, e.g. for master data reduction before migration to SAP S/4HANA®

Checking the master data for current use, including marking for archiving, deletion, etc., reduces the volume of data to be migrated.

GDPR and archive/deletion flag on board

The right to be forgotten is already included, without compromising the ability to provide information to official bodies.
